Teeth Straightening

Orthodontics can be a great way of straightening your teeth and improving your smile without the more destructive option of crowns and bridges. Our primary focus in this context is on correcting anterior crowding.

Clear aligners

A wonderful way to straighten your teeth:

- removable
- comfortable
- nearly invisible.

This system uses a series of custom-made clear trays to gradually align teeth. The number of trays and length of treatment varies according to the complexity of the case. The more crowding you have, the more trays needed to align your teeth.

We can show you digitally how your teeth will gradually align as you wear each aligner.

The advantage of this system is that trays are clear and are therefore almost invisible.

simplysmile®

Fixed tooth coloured braces

Here we bond ceramic brackets to your teeth at different positions and a fine arch wire is used to move the teeth to different positions. All sorts of tooth movement can be achieved with fixed appliances, including space closure, correcting irregular bites and twisted teeth.

You can barely see the brackets and wires. Movement of front teeth can be very quick. We use Simply Smile and direct ceramic bonding.

Treatment planning

If you are interested in having your teeth straightened, we will take a series of photographs and some impressions to make plaster models of your teeth. We can then discuss various options available to you to straighten your teeth.

Costs are very affordable and can be spread over the year or you can take advantage of one of our finance options. Costs vary according to the complexity of the case but typically, for upper and lower arches, are approximately:

- Clear aligners (upper & lower teeth) from £2,800.00
- Fixed ceramic brackets (upper & lower teeth) from £2,800.00

Costs can be spread over the year with incremental payments upon each visit. We also offer finance options.

Cosmetic bonding

If you have wear and misshaped teeth, we may consider cosmetic bonding in addition to orthodontic treatment to produce an enhanced aesthetic result. This involves bonding white filling material to your teeth. We can discuss this option with you when we are treatment planning.

Teeth whitening

Having straightened your teeth, you may like to have your teeth whitened. We offer orthodontic patients a discounted rate for home whitening.

In order to assess your suitability for treatment and what is right for you, come in and see Sal, our Treatment Coordinator, for a free consultation to discuss your treatment options.

Please pop in or telephone to book a time for a chat.
